

I feel that telemarketing is worse then "spam" on the internet because spam can be blocked or ignored. I object to any weaking of Wisconsin's telemarketing law. In fact I would like to see both the state law and Federal law made even stronger by prohibiting any kind of telemarketing to those who do not wish to receive these kind of calls. I do not believe that the right of free speech give the speaker any right to have anyone listen and I feel that telemareting is a violation of my right to privicy in my own home. I also feel that allowing any telemareting to cell phones endangers public safty.
